What inspired you to choose these colours?

Inspired by the chic, couture and sophisticated style of Coco Chanel's signature style of a black, white and blush colour pallet, this creative style shoot married french inspired details with ultra luxe, high style fashion and beauty. We were inspired by the softness and femininity of pinks and blushes married with the modern and chic feel of black accents.

What is the first piece of advice you give to couples?

The first piece of advice we give to our clients is to try and establish a theme based on their personal style and tastes. This is critical to the design process and allows the designer to steer them in the right direction with flower and decor choices.. We also like them to establish a realistic budget to avoid disappointment.
